"Operations Now" introduces operations from a vantage point that encompasses both the entire organization and the broader supply network. The author begins his discussion of operations management by first establishing the goal to which any high quality operation must aspire: the goal of profitability.

A supply chain is a collection of suppliers required to create one specific product for a company. The chain is made up of nodes or “links,” which can include multiple manufacturers for parts, then the completed product, then the warehouse where it is stored, then its distribution centers, and finally, the store where a consumer can purchase it.
