The topic of history has been treated frequently in modern European philosophy. A long, largely German, tradition of thought looks at history as a total and comprehensible process of events, structures, and processes, for which the philosophy of history can serve as an interpretive tool.

## *Philosophy of History (Stanford Encyclopedia of Philosophy)*

With a recent surge of interest in the field, a volume taking stock of important theoretical shifts in the philosophy of history is greatly needed. A Philosophy of History fills this gap by weaving together a range of perspectives on the field which finds itself at a crossroads, and asks where it is headed in the 21st century. The book takes a concerted effort to go beyond the customary three-fold distinction between the speculative, analytic and narrativist approaches in philosophy of history.

*Department of History and Philosophy of Science*

Those from history, philosophy and the social sciences learn more about the essential roles and developments of the sciences, medicine and technology in the world. With these techniques, they are taught how to follow the ways in which sciences, technology and medicine changed and how to appreciate the way they function now.

The History and Philosophy of Psychology section is an interdisciplinary section that looks at the intersection between the three areas, bringing together psychologists, historians and philosophers. While we are primarily interested in both the history of psychology and the philosophy of psychology, there exists a growing awareness and understanding that it is in the dialogue between the two where the most is to be gained in terms of looking back, assessing the present and moving forward.

Historically, philosophy encompassed all bodies of knowledge. From the time of Ancient Greek philosopher Aristotle to the 19th century, "natural philosophy" encompassed astronomy, medicine, and physics. For example, Newton's 1687 *Mathematical Principles of Natural Philosophy* later became classified as a book of physics.

About The History and Philosophy of Science: A Reader. The History and Philosophy of Science: A Reader brings together seminal texts from antiquity to the end of the nineteenth century and makes them accessible in one volume for the first time. With readings from Aristotle, Aquinas, Copernicus, Galileo, Descartes, Newton, Lavoisier, Linnaeus, Darwin, Faraday, and Maxwell, it analyses and discusses major classical, medieval and modern texts and figures from the natural sciences.

(November 2019) Philosophy of history is the philosophical study of history and its discipline. The term was coined by French philosopher Voltaire. In contemporary philosophy a distinction has developed between speculative philosophy of history and critical philosophy of history, now referred to as analytic.
