## **Taxonomic Revision Of The**

A taxonomic revision or taxonomic review is a novel analysis of the variation patterns in a particular taxon. This analysis may be executed on the basis of any combination of the various available kinds of characters, such as morphological, anatomical, palynological, biochemical and genetic.

## **Taxonomy (biology) - Wikipedia**

Abstract. A taxonomic revision of the genus *Chaquihua* is presented confronting new material with the literature descriptions of the genus. The nymph and male imago are described here for the first time and the existing descriptions of other developmental stages are complemented. Association of larvae and winged stages is now confirmed by rearing.

The genus *Scedosporium* (previously also *Pseudallescheria*) has undergone a major taxonomic revision in the last decade on the basis of phylogenetic analysis and simplification of nomenclature.

## **Taxonomic Revisions - an overview | ScienceDirect Topics**

The primary objective of a revision is to take an established taxonomic classification and, based upon novel data analysis, synthesise a novel ("revised") classification. Thus during the course of a revision a fundamental alteration occurs between the initial and the novel classification, i.e. new taxa may be formed, taxonomic limits

The taxonomic revision within Leiothrichidae has been treated in another paper (Cibois et al., 2018). However, the comprehensive phylogeny presented here highlighted the particularity of the genus *Alcippe*, whose position relative to Leiothrichidae and Pellorneidae is not unanimously strongly supported in our analyses (see Section 4.1), and also varies among other studies (Gelang et al ...
