Acidic means that something contains an acid, with a pH below 7. Acidity, or the amount of acid in food, is very important,.The higher the acidity, the less likely that microorganisms can grow. Microorganisms can

# Acces PDF Acid Base Test Kit I Answers

cause sickness and even death, which is why it is essential to test the acidity of food, especially when canning or jarring.

## **How to Test the Acidity of Food | LEAFtv**

The traditional test for determining acid production by Neisseria and related species has been the Cystine Trypticase Agar (CTA) test in which a base medium was supplemented with a 1% (final concentration) filter-sterilized carbohydrate solution adjusted to a final pH of 7.3. Phenol red indicator is added to detect acid; this indicator changes from red (alkaline) to yellow (acid).
