Illustrative Mathematics Algebra 1, Unit 7.5 Practice ...

Later in the lesson, students think about why a quadratic equation that has an expression in factored form on one side of the equal sign but does not have 0 on the other side cannot be solved the same way as when the equation is $(\text{expression}) = 0$. They also notice that dividing each side of a quadratic equation by a variable is not reliable because it eliminates one of the solutions.

Illustrative Mathematics Algebra 1, Unit 7.5 Preparation ...

In this lesson, students examine the meaning of negative exponents in context. In both cases, time (t) is the independent variable and $(t = 0)$ corresponds to some particular moment when a quantity is first measured. In these situations, a value of (t) that is less than 0 corresponds to a time before the initial measurement, while a value of (t) that is greater than 0 refers to a time ...
