Projectile Motion PhET Simulation KEY The formulas for vertical motion that have time in them are $y = y_0 + v_{y0} t - \frac{1}{2} g t^2$ and $v_y = v_{y0} - g t$. The first one is for height and the second one for final velocity. We will use the formula for height and modify it for our situation.

Answer: A Justification: The time of flight of a projectile depends entirely on the height of the trajectory. WHY? The time of flight is the time it takes to reach its maximum height plus the time it takes to fall from there to the ground. Since ball A has the highest trajectory, it will have the longest flight time.
