The AO classification of fracture wound severity provides a grading system for injuries of each of the skin (I), muscles and tendons (MT), and neurovascular (NV), each of which is divided into five degrees of severity. It is designed to provide a unique, unequivocal definition of any injury and, thereby, allows accurate comparison of cases.

Journals and publications - AO Foundation

Based on the AO Principles of Operative Management of Fractures as applied to the pelvis and acetabulum, this publication covers:
Acute management of pelvic and acetabular fracture patients
Definitive treatment of both fractures by operative approaches for reduction and internal fixation—from conventional methods to new percutaneous techniques

Books - AO Books | Video Portal - AO Foundation

The main principle in any reduction, regardless of the method employed, is to correct the deforming forces that resulted in the injury. Prior to this, some clinicians may suggest an initial exaggeration of the fracture, before the definitive reduction manoeuvre, aiding to uncouple the proximal and distal fracture
