## Worksheet 16: Arithmetic & Geometric Sequences

Arithmetic and Geometric Sequences

Arithmetic and Geometric Sequences. A sequence is a list of numbers or objects, called terms, in a certain order. In an arithmetic sequence, the difference between one term and the next is always the same. This difference is called a common difference. The common difference is added to each term to get the next term. 2, 5, 8, 11, 14, ...

An arithmetic series is one where each term is equal the one before it plus some number. For example: 5, 10, 15, 20, .... Each term in this sequence equals the term before it with 5 added on. In contrast, a geometric sequence is one where each term equals the one before it multiplied by a certain value. An example would be 3, 6, 12, 24, 48, ....
