Forward Linkages In

In Hirschman's area of study, known as development economics, backward linkages exist when investments in an industry profit from inputs and forward linkages exist when investments in an industry profit from outputs.

What Are Backward and Forward Linkages? - Reference.com

When a project is made and is intended to strengthen investment in later stages of production, this is called a forward linkage. In economics, linkages can impose fluctuations in the marketplace. For example, consider a product that is being produced in stages by multiple manufacturers. A backward linkage effect would refer to what happens when an increase in production, created by a manufacturer further down the line of production, causes a positive effect for the manufacturer sitting ...

What Are Backward And Forward Linkages In Economics? - The ...

For an industry, backward linkages are directed towards suppliers; while the forward linkages are directed towards consumers. We take an example of a steel mill here. To perform its economic activity, the mill needs inputs from coal mining and iron ore mining. These constitute its backward linkages. When the steel mill sells its produce, it needs to develop links with metal fabrication industry, construction companies, wholesalers and retailers of steel etc. These constitute the forward ...

Backward linkages include coal and iron ore mining. Forward linkages include items such as canned goods. While this industry has strong linkages, it is not a good leading sector. Any industry that has a high capital/output ratio and causes significant costs to other businesses has the potential to hurt the developing economy more than it helps it. A better leading sector would be the beer industry. [citation needed] Linkages and last industries

"direct" calculates the direct backward and forward linkages. For backward linkages, this is the column sum of the input matrix of technical coefficients (A):

$$BL_{j} = \frac{\sum_{i=1}^n a_{ij}}{\sum_{i=1}^n a_{ij}}$$

For forward linkages, this is the row sum of the output matrix of technical coefficients (B):
