**Building up mathematics (Book, 1960) [WorldCat.org]**

Zoltán Pál Dienes (anglicized as Zoltan Paul Dienes) (June 21, 1916 – January 11, 2014) was a Hungarian mathematician whose ideas on education (especially of small children) have been popular in some countries. He was a world-famous theorist and tireless practitioner of the " new mathematics ": an approach to mathematics learning that uses games, songs, and dance to make it more appealing to children.

**Why Teach Mathematics with Manipulatives?**

Abstract. Zoltan Dienes' principles of mathematical learning have been an integral part of mathematics education literature and applied both to the teaching and learning of mathematics as well as research on processes such as abstraction and generalization of mathematical structures. Most extant textbooks of cognitive learning theories in mathematics education include a treatment of Dienes' seminal contributions.
