

Chapter 5 Lab 5 1 Hot Standby Router Protocol

This is likewise one of the factors by obtaining the soft documents of this chapter 5 lab 5 1 hot standby router protocol by online. You might not require more become old to spend to go to the books start as without difficulty as search for them. In some cases, you likewise realize not discover the proclamation chapter 5 lab 5 1 hot standby router protocol that you are looking for. It will totally squander the time.

However below, in imitation of you visit this web page, it will be in view of that agreed easy to acquire as well as download guide chapter 5 lab 5 1 hot standby router protocol

It will not admit many get older as we run by before. You can realize it even though comport yourself something else at home and even in your workplace. in view of that easy! So, are you question? Just exercise just what we have enough money under as with ease as review chapter 5 lab 5 1 hot standby router protocol what you behind to read!

Sending 5, 100-byte ICMP Echos to 172.16.12.1, timeout is 2 seconds: !!!! Success rate is 80 percent (4/5), round-trip min/avg/max = 1/3/9 ms DLS2# Step 5: Configure default routing between DLS switches. At this point, local routing is supported at each distribution layer switch.

~~CCNP SWITCH Chapter 5 Lab 5 1 Inter-VLAN Routing (Version 7)~~

Step 1: Prepare the switches for the lab. Erase the startup config, delete the vlan.dat file, and reload the switches. Refer to Lab 1-1, " Clearing a Switch " and Lab 1-2, " Clearing a Switch Connected to a Larger Network " to prepare the switches for this lab. Cable the equipment as shown. Step 2: Configure the host IP settings.

Step 1: Verify SDM template (dual-ipv4-and-ipv6 routing / lanbase-routing) This lab starts with the switches being configured from the previous lab (5-1, Inter-VLAN Routing). To support IPv6, the correct SDM template must be in use on your switches (the 3560 will use dual-ipv4-and-ipv6 routing while the 2960 will use lanbase-routing).

Task 1: Getting started. First, start Sodbeans. You will create a new project; however, you will not be creating a blank application this time. Instead, in the New Project dialog, select "Quorum Application." You must select this option when using actions due to the way Quorum understands your programs. (We will discuss this later in Chapter 5).
