Summary 5.1

Weathering

Online Library

Chapter 5

Mechanical Weathering Soil

weathering occurs when physical forces break rock into smaller and smaller pieces without changing the rock's mineral composition.

In nature, three physical processes are especially important causes of mechanical weathering: frost

Chapter 5 Weathering and Soil – Physical Geology

Section 5.2 Soil.

Weathering produces a layer of rock and mineral fragments called regolith. Soil is part of the regolith that supports the growth of plants. Soil has four major components: mineral matter, or broken

Online Library

Chapter 5

down rock; organic matter, or humus, which is the decayed remains of organisms; water; and air. Humus is found in topsoil.

Chapter 5
