China Le Service Manual - infraredtraining.com.br

Note: When repairing more porous materials such Terra Cotta, stone or plaster, epoxy is required to be placed on both sides and heating the surface to 100 - 140 degree F prior to the epoxy application on both sides of the object improves bonding. Be aware, heating surfaces speeds up cure time and therefore reduces workability. You have to achieve proper positioning twice as fast as you would ...

See the illustrations at the bottom of this guide for a visual reference on the difference between the two types of connections. Wiring Dos and Don'ts. DO. DO Use Stranded Wire. With stranded wire you get more intimate contact, thus reducing voltage drop and power losses. Poor connections can rob a system of a significant portion of the power ...
