Chromosomes And Dna Workbook

Pages Answer Key

The two chromosomes in a homologous pair are generally very similar to one another.

They ' re the same size and shape, and have the same pattern of light and dark bands, as you can see in the human karyotype (image of the chromosomes) shown above.

Bands appear when the chromosomes are stained with a dye, and the dark bands mark more compacted DNA (usually, with fewer genes), while the light

bundles of tightly packed DNA located in the nucleus (in eukaryotic cells). In prokaryotes, however, the chromosome exists as a circular DNA (located in the cytoplasm in the nucleoid) that can also be found in the plasmids. In eukaryotic cells, also, chromosomes can be found outside the nucleus in such organelles as the mitochondria.
