CITIZEN responded to the challenge by starting to develop watches driven by a completely new energy source: light. And in 1976, we created the world's first light-powered watch. The technology was named Eco-Drive. Eco-Drive converts any kind of light into energy to power a watch, storing the surplus on a power cell.

Citizen Eco-Drive Watches - Powered by Light | Citizen

How to use the Tachymeter The most common use of a tachymeter is for measuring the approximate speed of a vehicle over a known distance. e.g.) Based on how many seconds it takes a vehicle to travel 1km or 1 mile (the available measuring range is up to 60 seconds), the average speed within the distance can be calculated.

How to use the Tachymeter | CITIZEN WATCH Global Network

A powerful stainless steel case with a sleek black dial and powerful red accents make this watch the perfect accessory for any man's wardrobe. Featuring 1/5-second chronograph measuring up to 60 minutes, 12/24-hour time and date. Featuring our Eco-Drive technology - powered by light, any light. Never needs a battery.
