A Common Table
Expression (CTE)

is the result

set of a query

which exists

temporarily and

for use only

within the

context of a

larger query.

Much like a

derived table,

Read Online Common Table

Expressions of a CTE is not stored and exists only for the duration of the query. This article will focus on non-recurrsive CTEs.

Read Online Common Table Expressions

In this example:

First, we used
`cte_sales` as the

name of the

common table

expression. We

skipped the

column list of

the CTE so it is

derived from the

CTE definition

statement. In

this example, it

Read Online Common Table

includes

```
staff_id and  
order_count  
columns..
```

Second, we use

the following
query to define
the result set
that populates
the common table
expression
cte_sales. The
query returns
the number of
