The Third edition of Data Abstraction and Problem Solving with Java: Walls and Mirrors employs the analogies of Walls (data abstraction) and Mirrors (recursion) to teach Java programming design solutions, in a way that beginners find accessible. Readers will gain a solid foundation in data abstraction, object-oriented programming, and other problem-solving techniques.

Data Abstraction and Problem Solving with Java: Walls and ...

The “ walls and mirrors ” mentioned in the title represent problem-solving techniques that appear throughout the text. Data abstraction hides the details of a module from the rest of the program, whereas recursion is a repetitive technique that solves a problem by solving smaller versions of the same problems, much as images in facing mirrors grow smaller with each reflection.
