[apimdev.astralweb.com](http://apimdev.astralweb.com)

Distillation refers to the selective boiling and subsequent condensation of a component in a liquid mixture. It is a separation technique that can be used to either increase the concentration of a particular component in

# Download File PDF Distillation

the mixture or to obtain (almost) pure components from the mixture.

Distillation - Definition, Detailed Process, Types, Uses

Distillation is the process of separating the components or substances from a liquid mixture by using selective boiling and

# Download File PDF Distillation

Condensation. Distillation may result in essentially complete separation (nearly pure components), or it may be a partial separation that increases the concentration of selected components in the mixture.
