## Earth Science Geology, the

Environment, and the Universe

Geology is the primary Earth science.

The word means "study of the Earth."

Geology deals with the composition of

Earth materials, Earth structures, and

Earth processes. It is also concerned

with the organisms of the planet and

how the planet has changed over time.

Geologists search for fuels and

minerals, study natural hazards, and

work to protect Earth's environment.

What is Earth Science? | Geology.com

Environmental Earth Sciences is an

international multidisciplinary journal

concerned with innovative approaches

and significant aspects of interaction

between humans, natural resources or

unique geographic zones, with

emphasis on the solid earth. In pursuit

of these topics, the geoscientific

Earth Science Geology, the  
Environment, and the Universe ...  
Environmental Science provides an  
overview of how science affects our  
environment. We focus on interactions  
between the solid Earth, its water, its  
air and its living organisms, and on  
dynamic, interdependent relationships  
between these four components. Earth  
and environmental scientists also  
consider how these relationships

Earth Science Geology, The  
Environment and Universe ...

Geology is the study of materials that make up the Earth, the processes that form and change these materials, and the history of the planet and its life-forms since its origin. Oceanography is the study of oceans, which cover nearly three-fourths of the planet. Environmental science is the study of the interactions of organisms and their surroundings.
