Check out this Gizmo from @ExploreLearning! Begin with a single cell and watch as mitosis and cell division occurs. The cells will go through the steps of interphase, prophase, metaphase, anaphase, telophase, and cytokinesis. The length of the cell cycle can be controlled, and data related to the number of cells present and their current phase can be recorded.

Gizmo of the Week: Cell Division. by Meredith Cole September 28, 2015. In the Cell Division Gizmo, students are able to observe the formation of two daughter cells from a single parent cell and explore cell activity and organelle behavior during the various phases of cell division. Why does cancer occur in living things?

### ~~Gizmo of the Week: Cell Division | ExploreLearning News~~

Gizmo Warm-up Meiosis is a type of cell division that results in four daughter cells with half as many chromosomes as the parent cell. These daughter cells mature into gametes, or sex cells. In the Meiosis Gizmo, you will learn the steps in meiosis and experiment to produce customized sex cells and offspring. On the STEPS tab, click Male.
