Strategic facility planning facilitates the organization's strategy by optimizing facilities to satisfy the strategic relationships between the organization, products/services, and facilities. The strategic facility planning is a two-to-five year plan encompassing the entire portfolio of owned and/or leased space that sets strategic facility goals based on the organization's strategic objectives .

### Facility Planning: Steps, Process, Objectives, Importance

Facility layout considers available space, final product, safety of users and facility and convenience of operations. An effective facility layout ensures that there is a smooth and steady flow of production material, equipment and manpower at minimum cost. Facility layout looks at physical allocation of space for economic activity in the plant.
