enzymes in cells that correct many of these mistakes, but on average, 3 – 5 errors are found in DNA after each replication. a.

Genetic Mutations - moosesapbio.weebly.com

The genes encoded in your DNA result in the production of proteins that perform specific functions within your cells. Various environmental factors and spontaneous events can lead to changes in genes. These changes, called mutations, can lead to alterations in the structure and activity of the proteins your cells use in their daily activities. In other words, changes to your genotype can result in changes to your phenotype.
