*Anomaly and
Mineral*

Prospectivity

Mapping in . . .

Abstract. In
this paper,
sequential

Gaussian

simulation (SGS)

File Type PDF

Geochemical

and number-size
(N-S) fractal
modeling were
used for copper
geochemical
anomaly mapping
in the western
part (training
area) of Kuhshah-
e-Urmak area,
Iran. Then,
according to the
generated
anomaly model in

File Type PDF

Geochemical

the training And

area, mineral

potential

mapping (MPM)

was performed

for the entire

study area based

on a well-fitted

regression model

as a data-driven

method.
