## Global Warming - an overview | ScienceDirect Topics

The cost and benefits of global warming will vary greatly from area to area. For moderate climate change, the balance can be difficult to assess. But the larger the change in climate, the more negative the consequences will become. Global warming will probably make life harder, not easier, for most people.

## Climate Q&A - Why is global warming a problem?

2/kWh (Li et al., 2017). Solution: Dividing the high (and low) capital cost of nuclear per kW by the low (and high) capital cost of wind per kW and multiplying the result by 14 GW gives a range of 58.7 to 149 GW nameplate capacity of wind that could have been installed and running prior to 2017.

## Evaluation of Nuclear Power as a Proposed Solution to ...

Fortunately, a growing number of investors understand that the industry’s business model is incompatible with what scientists are telling us we must do to slow global warming. That’s why we’re supporting the fossil fuel divestment movement. Tropical Forest Protection: To slow global warming, we must protect the world’s tropical forests. We’re doing our part by urging companies to commit to stop cutting them down—a commitment known as zero-deforestation.
