New cervical cancer screening guidelines 2020: What to know

An abnormal Pap test doesn't mean it's cancer, so take a deep breath and try not to panic. Pap tests, also called Pap smears, is a routine procedure to screen for cervical cancer during which a doctor collects a sample of cells from the cervix with a small brush.

Advice: How worried should I be about an abnormal pap test ...

The National Institutes of Health (NIH) do not recommend Pap smears for people under the age of 21. They also do not recommend that people over 65 get a Pap smear except under certain...

Pap smear: What age and how often? - Medical News Today

If the results of your Pap test come back positive, that means your doctor found abnormal or unusual cells on your cervix. It doesn't mean you have cervical cancer. Most often, the abnormal test...

Abnormal Pap Smear Results? Here's What To Do Next

A health care provider may simply describe Pap test results to a patient as "normal" or "abnormal." Likewise, HPV test results can either be "positive," meaning that a patient's cervical cells are infected with one or more of a group of high-risk HPV types (which is what most commercially available HPV tests detect), or "negative," indicating that none of the high-risk HPV ...

HPV and Pap Testing - National Cancer Institute

Follow these Guidelines: If you are younger than 21 years—You do not need screening. If you are aged 21 – 29 years— Have a Pap test every 3 years. If you are aged 30 – 65 years—You can choose one of three options: Have a Pap test and an HPV test (co-testing) every 5... Have a Pap test and an HPV test ...

Cervical Cancer Screening | ACOG

Screening Guidelines. The American Cancer Society (ACS), ASCCP, and the American Society for Clinical Pathology (ASCP) have released guidelines for the prevention and early detection of cervical cancer. The guidelines generally advise a reduction in the number of tests women get over their lifetime to better ensure that they receive the benefits of testing while minimizing the harms, and include a preference for co-testing using the Pap test and HPV test for women age ages 30 to 65.

Guidelines - ASCCP

Download Acog Guidelines For Pap Smears 2012 - The American College of Obstetricians and Gynecologists (ACOG) recently came out with new Pap smear guidelines Women should have their first screening Pap smear at age 21 unless the woman has had a previous abnormal Pap smear Women in their 20's should have a Pap smear every two years (assuming prior Pap smears ...
