Harley-Davidson just released it's first all-new Big Twin engine in 17 years, the 8-valve Milwaukee Eight, last month. We heard great things about it, but we had to try it to see what all the fuss was about – and what better way to really see how it compares to the Twin Cam, than riding them both back-to-back!

Harley Cooling is an effective way to help your twin cam engine. The oil cooler features a controlled fan that provides a continuous flow of cooling air, thus helping your engines cool down and reduce the wearing of the plastic shoes. This is recommended since it directly tackles the problem head-on.

Harley Davidson Twin Cam Engine Problems? What To Do ...

The Harley-Davidson Milwaukee-Eight engine is the ninth generation of "big twin" engines developed by the company, but only Harley's third all-new Big Twin in 80 years, first introduced in 2016. These engines differ from the traditional Harley Big Twin engines in that there are four valves per cylinder, totaling eight valves, hence the name. It also marked a return to the single-camshaft ...

Harley-Davidson Milwaukee-Eight engine - Wikipedia

Harley-Davidson claims a peak torque output of 105.5 ft-lb. rpm from the Twin-Cooled 103 engine compared to 104.7 ft-lb for the also-revised for 2014 air-cooled engine and 100 ft-lb. from the 2013 air-cooled engine.
