How Is Climate Different From

Understanding Climate. While weather refers to short-term changes in the atmosphere, climate refers to atmospheric changes over longer periods of time, usually defined as 30 years or more. This is why it is possible to have an especially cold spell even though, on average, global temperatures are rising.

Weather or Climate ... What's the Difference? | National ...

Even though there ' s only one atmosphere on Earth, the weather isn ' t the same all around the world. Weather is different in different parts of the world and changes over minutes, hours, days, and weeks. Most weather happens in the part of Earth ' s atmosphere that is closest to the ground—called the troposphere.
