try and get an ignition barrel from somewhere else and just wire it into your existing ignition wires.imobilisers are easy to get rid of tbh. alternatively you could ring ford as they should be able to get you a new key from the number that should be stamped on the barrel.

UKC Forums - Hotwiring a ford fiesta

Run a section of 18-gauge wire from the "B" terminal on the solenoid to the "S" terminal on the starter motor. Strip 1/4 inch of wire from the end of the wire using the wire strippers and then crimp a blue ring terminal on each end. Then connect the wiring to the terminals using the open-end wrench set.

How to Wire a Ford Solenoid | It Still Runs

Hot-wiring generally involves connecting the wires which complete the circuit when the key is in the "on" position (turning on the fuel pump and other necessary components), then touching another wire that connects to the starter. The specific method of hot-wiring a vehicle is dependent on the particular vehicle's electrical ignition system.
