study, microeconomics deals with various forces which explain how prices of factors of production (rent, wage, interest and profit) are determined and how prices of commodities are affected.

Introduction to Microeconomics - Businessstopia

Microeconomics, the focus of this course, examines the behavior of individual decision-making units in the economy, business firms and households, and the functioning of individual industries. Choices made by firms regarding what to produce and how much to charge, and choices made by households regarding what and how much to buy, help explain why the economy produces the goods and services it does.
