ISO/IEC 20000 is the first international standard for service management. It was developed in 2005 by ISO/IEC JTC1/SC7 and revised in 2011 and 2018. It was originally based on the earlier BS 15000 that was developed by BSI Group. ISO/IEC 20000, like its BS 15000 predecessor, was originally developed to reflect best practice guidance contained within the ITIL framework, although it equally supports other IT service management frameworks and approaches including Microsoft Operations Framework and

ISO/IEC 20000 - Wikipedia

To get an ISO/IEC 20000 certification, organizations need to establish, implement, and maintain service management processes as per the requirements document. IT management tools are used to implement service management processes under the ISO/IEC 20000-1 standard to provide the necessary audit records as evidence, to facilitate certification, and to help retain compliance with specifications over time.
