A laboratory
information
management system,

Systems And

Where To Download

Sometimes referred to as a laboratory information system or laboratory management system, is a software-based solution with features that support a modern laboratory's operations. Key features include—but are not limited to—workflow and data tracking

Systems And

Where To Download

support, flexible architecture, and data exchange interfaces, which fully "support its use in regulated environments". The features and uses of a LIMS have evolved over the years from simple sample ...
