Music Is a Powerful Learning Tool for Hearing-Impaired Children. It may seem counter-intuitive that music can help the hearing-impaired to detect sound, but that is exactly what research is discovering. In fact, scientists are finding that music and singing may help hearing-impaired children to perceive speech.

In addition to reducing stress and increasing mental alertness, singing may also benefit our hearing. Specifically, it might improve the way we understand conversations which take place in noisy places. A report in the Neuroscience of Singing shows that “ when we sing our neurotransmitters connect in new and different ways. Singing fires up the right temporal lobe of our brain, releasing endorphins that make us smarter, healthier, happier and more creative.

Even if you sing off key, your own singing is the best way to use music as a teaching tool for your children. For some children, singing as they read, or reading as they sing, will be the activity that will make reading become a fun and enjoyable activity. For other children it might be the activity that turns discouragement into success.

I decided to check in on line, about my mom, with dementia and as of maybe the last 5 or so months that I am aware, is hearing music and a man humming in her ears, usually at night! The reason I found out about this is I have been sleeping in her room, and at night she would mention hearing the music and the man singing in her ear, and it was loud!

In music, sight-reading, also called a prima vista (Italian meaning "at first sight"), is the practice of reading and performing of a piece of song in a music notation that the performer has not seen or learned before. Sight-singing is used to describe a singer who is sight-reading. Both activities require the musician to play or sing the notated rhythms and pitches.

## ~~Hearing Aids and Music, Do They Work?~~

Sight reading is useful to composers who need to hear how their music sounds when performed by its intended ensemble. Many of today ' s composers “ mock up ” their music using MIDI technology and software instruments. These can sound quite realistic, but nothing can equal the sound of live instrumentation.
