FIRE PROTECTION DESIGN
MANUAL.pdf | NFPA Xchange

NFPA 33 is designed to specifically address fire safety. Additional codes are required to meet workers' health and safety guidelines and environmental regulation. There are OSHA standards that protect booth operators from toxic properties found in paint chemicals and the NESHAP organization sets a minimum amount of what types of pollutants can be released into the atmosphere.

NFPA - A Reporter's Guide to Fire and the NFPA

NFPA 921 sets the bar for scientific-based investigation and analysis of fire and explosion incidents. Referenced in the field, in training, and in court, it is the foremost guide for rendering accurate opinions as to incident origin, cause, responsibility, and prevention. It is intended for use by both public sector employees who are responsible for fire investigation and private sector professionals who conduct investigations for insurance
