## *300 Continental Engine*

The Continental O-300 and the C145 are a family of air-cooled flat-6 aircraft piston engines built by Teledyne Continental Motors. First produced in 1947, versions were still in production as of 2004. It was produced under licence in the United

Engine

*TCM Continental*

*O-300-A - Norvic Aero  
Engines*

The O-300 is what might be called a “48” engine. In other words, a combination of rpm and manifold pressure that equals 48 is 75% power. For example, 24? mp x 24 (00) rpm = 75%.

# Online Library

## O 300

Other 75% settings might be 23? x 2500, 22? x 2600 or 21 x 2700 rpm. Other power settings can be determined by consulting the chart.

## O 300

The O-300 engine is a peach really. Smooth and nice-sounding.

Continental engines are better for low utilisation aircraft when compared to Lycoming because the cams are on the bottom of the engine sitting in the oil. Low utilisation Lycoms from experience are prone to corrosion on the
