with a decent  
method of  
cutting time off  
Ork vehicles by  
spraying them  
with a silver  
base before  
painting. Its  
not a solid  
colour, more of  
a directional  
layer over a  
black base. From  
here the washes

and a drybrush  
of necron  
compound  
finished with  
some weathering  
powders does the  
trick.
