Researchers have been studying the connection between culture and personality for a long time. In this video, I’m going to explain two spectrums that researchers have created to define cultures. The culture’s place on these spectrums highly influences the personality traits and behaviors of the people in that culture.

Personality and Culture - Practical Psychology

Loosely defined, culture refers to the shared values, beliefs and norms of a specific group of people. Culture, therefore, influences the manner we learn, live and behave. Because of this, many theorists believe that culture is an important shaper of our personality. One of the general assumptions asserting the effect of culture to personality is that people who are born and bred in the same culture share common personality traits.
