The RSI indicator is based on the changes in the price action and not on the actual price itself . This is where the term Relative Strength (RS) comes

Where To Download Relative Strength Index

from. Calculating the RSI is quite simple. We need to divide the SMMA of the up changes by the SMMA of the down changes. Calculating the final RSI value

How to calculate the Relative Strength Index (RSI ...

Where To Download Relative Strength Index

The Relative Strength Index (RSI) is computed with a two-part calculation. The first formula is as follows: RSI
Step One = $100 - (100 / (1 + (\text{Average Gain} / \text{Average Loss})))$ Here, the average loss or gain is simply the average percentage loss or gain in a look-back period.
