spray dryers. In some chemical producing plants direct fired oil can be utilised.

Cyclones are a speciality of European SprayDry Technologies offering very high efficiencies for multiple product drying.

Scrubber Systems ensure that the majority of powder particles are arrested before discharging from the system.

~~Spray Drying—ESDT~~

SDS spray dryers can be used for spray cooling of process gasses. The gas is cooled by evaporative cooling and the dryer exhausts a dry, cooled gas that can be processed in other units, such as fabric filters. SDS spray dryers are also used in drying of waste streams to eliminate liquid effluents. • • • • .

For optimum performance, feed solutions
to spray drying systems are required to
possess the highest concentration of solids
possible. Some products have low solid
content as a raw liquid and without a pre-
concentration stage would not be cost
effective to spray dry.
