Step 1: Explain the project plan to key stakeholders and discuss its key components. One of the most misunderstood terms in project management, the project plan is a set of living documents that can be expected to change over the life of the project. Like a roadmap, it provides the direction for the project.

Step #1: Choose a Domain Name In order to build a website, the very first thing you ' ll need is a domain name. The domain name is your website name and address. That address is used by visitors when they try to find your site through their web browsers.

How to Create a Website: Step-by-Step Guide for Beginners ...
For the next step, I will discuss the vectorizer I used to transform text data into a sparse matrix so that they can be used as input for quantitative analysis. If your analysis is simple and does not require a lot of customization in preprocessing the text data, the vectorizers usually have embedded functions to conduct the basic steps, like tokenization, removing stopwords.
