After users' experience with the specification and development of new sheet steel applications, it was revised in 1981, 1989, 1998, 2008, and now in 2017. Also, in the 1981 edition, the title of the standard was changed to AWS D1.3/D1.3M, Structural Welding Code-Sheet Steel, to conform with the uniform titles now being given to standards developed by the AWS D1 Committee on Structural Welding.

Structural Welding Code-Sheet Steel

This code covers the requirements associated with welding sheet steel having a minimum specified yield point no greater than 80 ksi [550 MPa]. The code requirements cover any welded joint made from the commonly used structural quality low-carbon hot rolled and cold rolled sheet and strip steel with or without zinc coating (galvanized).
