## Subsea Pipeline

### Engineering

~~Engineer do? (with pictures)~~

A submarine pipeline (also known as marine, subsea or offshore pipeline) is a pipeline that is laid on the seabed or below it inside a trench. In some cases, the pipeline is mostly on-land but in places it crosses water expanses, such as

# Acces PDF Subsea Pipeline

small seas, straits and rivers. Submarine pipelines are used primarily to carry oil or gas, but transportation of water is also important.

~~Submarine pipeline—  
Wikipedia~~

Pipe diameters of  
16–42 inches  
(40–105 cm) are

# Acces PDF Subsea Pipeline

Engineering  
common on subsea pipelines. The most common joining method is to weld the pipes together on a pipelay vessel. In shallow water and over smaller distances, the pipes can also be pulled out ashore as new pipe lengths are welded (bottom drawing).
