JONCRYL 678 is a general purpose, mid-range molecular weight resin for water-based inks, pigment dispersions and overprint varnishes.

## JONCRYL® 678 | BASF

SPRAYTITE® technology uses ZONE3® zero-ozone-depleting blowing-agent technology, emits no volatile organic compounds (VOCs) and is one of the most environmentally responsible and lowest lifecycle cost systems available.. By eliminating condensing surfaces and offering no food source, it also resists mold, mildew and pest infestations, contributing to a safer, healthier indoor environment.

## SPRAYTITE® - BASF

BASF today opened its ASEAN Technical Development Center adjacent to its existing Polyurethane (PU) System House at Bangpoo site in Thailand. The new facility houses a state-of-the-art pre-polymer reactor technology to produce a hardener (component B) – a key component to boost product development efficiency, thereby enabling faster time-to-market of PU materials and solutions.
