The Distracted Mind: Ancient Brains in a High-Tech World ...

The Distracted Mind (always capitalized in this study of the same name) refers to our current state of affairs due to both our neurological makeup and our current use of technology. The authors—a psychologist and a neuroscientist—address the problem of our distractions from three angles.

The Distracted Mind: Ancient Brains in a High-Tech World ...

The Distracted Mind by Adam Gazzaley and Larry D. Rosen is a highly engaging read of how we cognitively pursue our goals and how our brains have to frequently overcome internal and external interference, including that from modern technologies, to do this successfully. The book includes excellent, clear examples of what these problems of goal interference are and how they might affect us in our daily lives.

The Distracted Mind: Ancient Brains in a High-Tech World Most of us will freely admit that we are obsessed with our devices. We pride ourselves on our ability to multitask. We feel we can read work email, reply to texts, check Facebook, watch video clips, talk on the phone, send texts, and drive a car ... all at the same time.

The Distracted Mind: Ancient Brains in a High-Tech World ...

The Distracted Mind: Ancient Brains in a High-Tech World by Adam Gazzaley and Larry D. Rosen. People are inherently information seekers. In today's high-tech world this tendency can draw us to

distraction and keep us from accomplishing our goals. Adam Gazzaley, a neuroscientist at the University of California, San Francisco, and Larry Rosen, a psychologist at California State University, Dominguez Hills put forward these ideas in their 2016 book entitled The Distracted Mind: Ancient Brains ...

The Distracted Mind: Ancient Brains in a High-Tech World ...

The Distracted Mind: Ancient Brains in a High-Tech World. We are living in extraordinary times. Rapid advances in information technology continuously transform our lives in countless ways. But we are now aware that our increasingly information-saturated world, coupled with growing expectations of constant availability and immediate responsiveness, can place excessive demands on our brains.
