A new wave of butcher shops has opened. To make the most of them, a basic understanding of the cuts of meat helps.

The Lost Art of Buying From a Butcher - The New York Times

The psychology of eating meat is a complex area of study illustrating the confluence of morality, emotions, cognition, and personality characteristics. Research into the psychological and cultural factors of meat eating suggests correlations with masculinity; support for hierarchical values; and reduced openness to experience. Because meat eating is widely practiced but is sometimes associated ...
