Between 1988 and 2005, the team of David L. Applegate, Robert E. Bixby, Vašek Chvátal, and William J. Cook developed one such solver, Concorde. The team was awarded The Beale-Orchard-Hays Prize for Excellence in Computational Mathematical Programming in 2000 for their ten-page paper enumerating some of Concorde's refinements of the branch and cut method that led to the solution of a 13,509-city instance and it was awarded the Frederick W. Lanchester Prize in 2007 for their book, The ...

the winter of 1972 at Stanford. Under the slogan “combinatorics = number theory + linear programming,” Vašek set out a general framework for this approach in “Edmonds Polytopes and a Hierarchy of Combinatorial Problems” [19].

## Vašek Chvátal: A Very Short Introduction

My research My initial research interests were in graph theory (with an emphasis on hamiltonian cycles and later on perfect graphs) and in combinatorics (with an emphasis on extremal problems). Then they extended to analysis of algorithms (with an emphasis on cutting-plane proofs) and to operations research (with an emphasis on linear programming).

Linear Programming Sol. Manual: An Illus Intro by Vasek ...  
For example, the proof that every standard form LP is either infeasible, unbounded, or has an optimal BFS is built on the simplex method- Since the algorithm terminates in one of these three states, and can't go into an infinite loop, these are the only possibilities.
