Crude is recouping some of its losses this morning on positive news coming out of China. China is the world's largest crude importer and reported that in September, they imported 11.8 MMBpd. This number was up 5.5% from last month and up 17.5% from last year. The IEA came out with its annual World Energy Outlook today. In the report, they say that forecasting has become harder than ever because, "The Covid-19 pandemic has caused more disruption to the energy sector than any other event ...

IEA World Energy Outlook - Crystal Ball? - Mansfield ...

COVID-19's impact on the energy sector has been greater than any other event in recent history and its effects are anticipated to linger for years to come. More than six months into the pandemic, it is still too soon to determine how the health crisis will reshape the energy sector, and if it is a roadblock in the progress of a more sustainable and secure energy system or an agent of change.

IEA's World Energy Outlook 2020 | News Break

World output could be 1 million barrels a day higher this month as the U.S. recovers from hurricane disruptions and as Libya resumes exports, the agency said. Libya, one of the three OPEC nations exempt from the agreement to restrain output, tripled production to 450,000 barrels a day last month as its political tumult abated, the IEA said.
